

St Patrick's Resource Centre

The resource centre was built from a very generous donation at the last fundraising dinner in 2017. We built it at St Patrick's school, as that is the nearest to the centre of Jinja, but it is available to all the schools in the JET group. It houses the computer room with computers donated by HSBC and a library with many books brought from the UK. It is very difficult to source both these in Uganda, so we are very lucky to be able to offer them to the children. Having access to these facilities has meant that the children are able to learn skills that will set them up for life in the developed world.
